PRODUCE BUYING COMPANY LIMITED CHAIRMAN'S STATEMENT

FOR THE YEAR ENDED 30 SEPTEMBER 2010

Distinguished Shareholders,

I am very pleased to welcome you once again to the 10th Annual General Meeting of the Produce Buying Company Limited and have the pleasure to present to you the Annual Report and Statement of Accounts of your company for the Financial Year ended September 30, 2010.

The 2009/10 financial year has been very remarkable for the Company in terms of both its operational and financial performances. The Company recorded an unprecedented high market share of 38% in relation to 35% the previous year and a profit before tax of GH ¢19.256million as against GH¢7.176million of the previous year. This impressive performance achieved by the Company through the collaborative efforts of the Board, Management and staff marks a major breakthrough in the efforts at achieving an improved and sustained profitability.

The company nonetheless continues to face various operational hurdles and high finance cost resulting from over-reliance on Bank Overdrafts for Cocoa purchases. The high finance cost as shown in the company's Financial Statements poses a serious challenge to the operational and financial capabilities of the Company. The Board and Management will continue to explore better funding arrangements in the coming years to lessen this cost and maintain it at an acceptable level.

COCOA PRODUCTION

National Cocoa purchases decreased by 11% from 710,639 tonnes in 2008/09 to 632,026 tonnes during the year under review mainly as a result of smuggling to the neighbouring countries. The impact of this on the company's performance was a lower 4% reduction in purchases from 247,881 tonnes in 2008/09 to 238,967 tonnes in 2009/10. The lower reduction was mainly due to the resilience of the company and the very effective operational arrangements pursued.

OPERATING RESULTS

Dear Shareholders, your Company's excellent performance during the year resulted in a net profit after tax of GH¢14.113million, a significant increase of 172% over and above the previous year's figure of GH¢5.194 million. The net profit after tax also represents 57.8% after tax return on capital employed. Our balance sheet also continued to show strong growth as shareholder's equity increased by 115.9% from GH¢11.316million to GH¢24.431million. Return on capital Employed (ROCE) also increased from the previous figure of 45.9% to 57.8%, indicating an improved outcome from fund utilization of your company.

It is gratifying to note that, the keen interest shown by shareholders and the very useful suggestions made by members during previous annual general meetings, in addition to sound financial and operational policies fashioned out by the Board and Management accounted for this highly impressive performance

2010 Financial Statements

To strengthen the capital base of the company for an even improved performance, your company found it necessary to increase its Stated Capital from GH ϕ 4.9 million to GH ϕ 15 million. This was made possible through a transfer of an amount of GH ϕ 10.086 million from the Income Surplus Account to Stated Capital. This process was tabled before shareholders and approved at an Extraordinary meeting held on the 29th. of September 2010.

INVESTMENTS

Dear Shareholders, the programme of increased investment in the haulage activities of the company is on course as more articulated and cargo trucks and tractors are acquired to replace old and over-aged vehicles which had been a wasteful drain on the Company's finances.

The state-of-the-art Parking Lot built by the Company at Tema at a cost of GH¢1.9million has been completed and rented out to Ghana Cocoa Board for use by the numerous vehicles that throng the port city with cocoa.

At the Company's Annual General Meeting held last year members were informed of the establishment of a subsidiary Company PBC SHEA LTD. for processing of Sheanut for export. This project is progressing as scheduled and we are presently awaiting the arrival of the equipment for the processing plant which have been shipped from Brazil.

The site of the project has been completely fenced and contracts for other civil works for installation of the plant and provision of the necessary structures have been awarded. We are hopeful that the whole project would be completed by the middle of 2011.

The Company will continue to exploit other investment opportunities in order to widen the revenue base for sustainable profitability in the years ahead.

SOCIAL SERVICES

The Company continued to contribute towards the socio-economic development of the rural communities in which it operates .During the year, the Company supported a number of development projects in the area of electrification, water supply and repair of roads and bridges for a number of communities within the cocoa growing areas. This social/development contribution of the company as well as its positive operational impact was duly recognized by the Ashanti region which conferred a platinum award for 'OUTSTANDING CONTRIBUTION TO THE ECONOMIC DEVELOPMENT OF ASHANTI' on the company, at the 7th Ashanti Business Excellence Awards held in Kumasi.

As a Company that operates and believes in the culture of the people of our catchment area, a number of traditional areas have also been supported in the course of the year in the celebration of their annual festivals.

Again the Company supported the National Best Farmer Awards through a cash donation of GH¢10,000 to the Ministry of Food and Agriculture for the 2010 programme. Your company further continues with the traditional Promotional packages that it accords its farmers throughout the purchasing areas.

Finally, the generally outstanding performance of your company in the course of the year culminated in the enhanced lift of the company's recognition on the prestigious GHANA CLUB 100 from the position of 89th in 2009 to 34th in 2010. We are most hopeful to rise further to the single digit position in the not too distant future as we continue to strive harder.

DIVIDEND

Distinguished Ladies and Gentlemen, the income surplus balance before appropriation as at the end of the year is $GH\phi7.382$ million. In pursuance of our Corporate objective of ensuring equitable return on investments to shareholders, your Directors have proposed a dividend of $GH\phi0.0088$ per share amounting to $GH\phi4.224$ million for payment. This amount constitutes 30% of after tax profit which is in line with Corporate dividend policy. This dividend payment is 138% over and above that of the previous year.

OUTLOOK

The 2009/10 financial year marked the tenth anniversary of the listing of the Company on the Ghana Stock Exchange and was celebrated with all pomp and pageantry. I am glad to note that your company gave a good account of its ten years existence on the exchange with the outstanding performance chalked, which has just been presented to you. Spurred by the current impressive performance, the Board and Management will not relent in their efforts to achieve more successes in the coming years to make Produce Buying Company the most preferred Company for investors.

As outlined in the Company's Fourth Medium Term Corporate plan the Company will increase its market presence in all cocoa growing areas as well as the financial and operational capacities in order to sustain the current profitability for the benefit of all stakeholders.

My personal advice to you as members of the PBC family is to hold on to your stocks firmly and wherever/whenever possible even build up on them since the future for your company is indeed most promising.

Finally, I wish to thank you Shareholders for your continued confidence and keen interest in our Company. I also wish to extend a hand of gratitude to Management and staff and fellow Directors for their invaluable support during the year.

Thank You

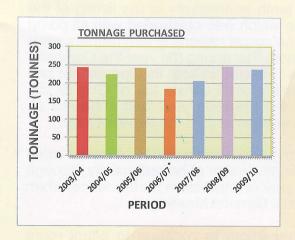

JOHN FRANK ABU (DR)

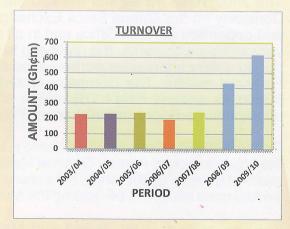

CHAIRMAN

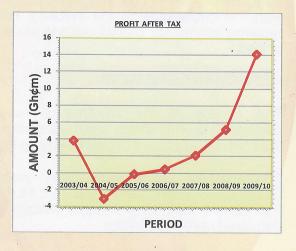

PRODUCE BUYING COMPANY LIMITED PERFORMANCE AT A GLANCE

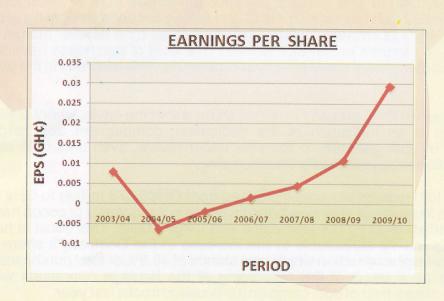

FOR THE YEAR ENDED 30 SEPTEMBER 2010

PRODUCE BUYING COMPANY LIMITED MANAGING DIRECTOR'S REVIEW OF OPERATIONS

FOR THE YEAR ENDED 30 SEPTEMBER 2010

The 2009/10 financial year marked the tenth anniversary of the listing of the Company on the Ghana Stock Exchange which was celebrated with all pomp and pageantry at Head Office and in all the cocoa regions where farmers were very active participants. It is gratifying to note that during the year the Company put up a very impressive performance as reflected in both its Operational and Financial results. The Company recorded a profit before tax of GH¢19.256 million as against GH¢7.176 million of the previous year and achieved an unprecedented high market share of 38% as against 35% the previous year.

Produce Buying Company has come a long way; from a period of losses when the organization of Annual General Meetings was an abhorred activity, through years of gradual upliftment to the current year of impressive performance, when we feel most excited to be holding the Annual General Meeting.

It is the resolve of the Board and Management to continue to adopt more pragmatic policies and programmes and institute proactive strategies to deal with the challenges of the industry, with the aim of increasing revenue and growing profits for higher returns on shareholder's investments in the years ahead.

PEFORMANCE REVIEW

The review of the Company's operations focuses on comparing key performance indicators, revenue earned and expenditure incurred, as well as the financial stance of the company to that of the previous year.

Turnover for cocoa operations increased from $GH\phi430.528$ million to $GH\phi622.664$ million an increase of 44.6% due to increase in producer price and the buyers take over margin though the volume of cocoa purchased and delivered reduced slightly.

With a reduction of 11% in national cocoa purchases from 710,639 tonnes in 2008/09 to 632,026 tonnes in 2009/10 due mainly to cocoa smuggling activities, the Company's purchases similarly reduced albeit by a smaller margin of 4% from 247,881 tonnes to 238,967 tonnes. This level of purchases nevertheless culminated in a market share of 38% as against the 35% recorded in the previous year.

The increase in the Company's market share within the environment of reduced purchases is an indication of the dedication, commitment and hard work exhibited by staff generally in the year under review, even under the extreme industry challenges especially the smuggling.

Turnover for Haulage services increased from GH¢6.878 million to GH¢10.239 million, an increase of 48% due to the increase in the quantity of cocoa hauled at the secondary level by our articulated and cargo trucks. This boost in haulage revenue is mainly attributable to the increase in the Company's share of the secondary level evacuation which now stands at 43.5% of total purchases. This has been as a result of the revamping of the haulage operations with the purchase of new fleet of both cargo and articulated trucks last year.

2010 Financial Statements -

Cost of sales for cocoa operations increased by 43.9% from GH¢384.297 million to GH¢553.059 million due mainly to increase in producer price.

Direct cost of haulage service also increased from GH¢3.127 million to GH¢3.614million, an increase of 15.6% attributable to increase in the quantity of cocoa carted by the Company's trucks at the secondary evacuation level.

Out of the turnover and the associated cost of sales, the Company recorded a gross profit of GH¢76.229 million as compared to last year's gross profit of GH¢49.982million, an increase of 52.5%.

Direct Operating Expenses increased by 38.9% over the previous year's figure of GH¢16.538 million to GH¢22.975 million. This cost being activity based, it was expected that the reduction in volume of purchases by 4% should have triggered a corresponding reduction in this cost, but that could not be as a result of major cost components in the direct costs that saw increases within the year.

These include:

- Agency Commission,
- Depreciation of operational Equipment and Machines,
- Motor Vehicle Insurance,
- Handling Charges and
- Grading and Sealing Cost.
- 1. Agency commission increased by 23.5% from GH¢7.546 million to GH¢9.319 million mainly due to the need to pay competitive commission to attract and retain loyal Marketing Clerks.
- 2. Depreciation of operational equipment and machines increased by 30.6% from GH¢2.956 million to GH¢3.862 million and motor vehicle insurance also increased by 33% from GH¢309,998 million to GH¢413,346 million mainly due to the purchase of additional fleet of haulage trucks during the year.
- 3. Handling charges increased by 14% from GH¢1.413 million to GH¢1.612 million and Grading and Sealing cost also increased by 29% from GH¢185,635 million to GH¢239,576 million due mainly to increase in the cost of providing these services, arising from the increased producer price.
- 4. General and Administrative Expenses which is made up of Staff Cost, Office Cost and Estate and Property rose by 33.3% from GH¢13.468 million to GH¢17.945 million. This is mainly attributed to increase in salaries of staff and payment of bonus to staff approved by the Board during the year under review.
- 5. Office Cost also increased by 89% from GH¢2.028 million to GH¢3.833 million. Significant components of this increase in Office Cost include Advertising and publicity, Annual General Meeting Expenses, Subscription and Donation as well as Software Development and Maintenance.

1. Total expenses (excluding Financing Cost) increased by 36.4% from GH¢30.007 million to GH¢40.920 million.

The Company thus registered an operating profit before financing cost of GH¢37.659 million compared to the previous year's figure of GH¢21.823 million, a significant increase of 72.6%. Net financing cost also increased by 25.6% from GH¢14.647 million to GH¢18.402 million attributed mainly to the Company's continuous heavy reliance on Overdrafts for cocoa operations. The high finance cost is a serious challenge to the Board and Management and every effort is being applied to reduce this to a more acceptable level.

Other income increased by 27% from GH¢1.848 million to GH¢2.349 million during the year mainly due to receipts from the sale of Cocoa Sample Residue and the increase in shortages recoveries.

The net profit before tax for the year came up to GH¢19.256 million as compared to the previous year's figure of GH¢7.176 million, a significant increase of about 168.34%.

KEY PERFORMANCE INDICATORS

Key performance indicators of the Company's activities improved in line with the significant increase in the Company's profitability.

- 1. Basic Earnings per Share (EPS) increased by 172.2% from 0.0108 to GH¢0.0294.
- 2. Return on Capital Employed (ROCE) also increased from the previous year of 45.9% to 57.8%.
- 3. The balance sheet also showed a significant growth with shareholders equity moving from GH¢11.316 million to GH¢24.431 million, an increase of 115.9%.
- 4. The Price/Earning (P/E) ratio has also reduced significantly from previous year figure of 17.6 to 4.76. as a result of the improved earnings.

SOCIAL SERVICES

In exercising its corporate social responsibility, the Company contributed towards various developmental projects in the Communities in which it operates. Notable among them were electrification projects, water projects, repairs of roads and bridges as well as support to cultural activities in various locations.

It is gratifying to note that the Company was conferred with a Platinum Award for outstanding contribution to the economic development of Ashanti at the 7th Ashanti Business Excellence Awards held in Kumasi. This is a clear testimony of how far the Company's social responsibility has been felt and appreciated in our operating areas.

As "Friends of Farmers", The Company supported the National Best Farmer Award with a donation of GH¢10,000 to the Ministry of Food and Agriculture, while also continuing with our promotional programmes for farmers who sell to the company.

As a Company which derives its strength from the rural communities, the Company will not relent in its efforts at giving back to improve the living conditions of these communities as our finances improve.

OUTLOOK

The Company has completed its 4th 3-Year Medium Term Corporate Plan. Highlights of projections in the plan include the following:

- 1. The Company will adopt an aggressive marketing posture by expanding our field operations and presence to achieve a market share of 43% within the plan period.
- 2. The Company will partake in the Secondary Evacuation activities with the hope of hauling 50% of cocoa purchases within the period.
- 3. More emphasis will be laid on providing adequate and improved storage facilities, through conscious efforts at rehabilitating and renovating dilapidated sheds and depots as well as constructing new ones.
- 4. The expansion of the Company's ICT programme will also be pursued with all the vigour it deserves.
- 5. Management shall continue to adequately motivate workers through improvement of the working environment to boost job satisfaction and implement result-oriented performance-measurement-appraisal system to reward exceptional performance.
- 6. The Company will continue to pursue the programme towards the establishment of PBC-Shea Processing Plant. It is expected that PBC Ltd will purchase a total of 40,000 tonnes of sheanut annually within the plan period to feed the processing plant.

We wish to re-assure our Shareholders and Directors of our commitment to monitor the various investment projects undertaken by the Company to ensure that the desired results are achieved, in support of our efforts at maintaining PBC Ltd as the most preferred company for investors.

Finally, I wish to thank the Board of Directors, Management and staff of the Company for the outstanding performance during the year in spite of the challenges and look forward to higher successes in the years ahead.

Thank you.

M. KOJO ATTA-KRAH MANAGING DIRECTOR

PRODUCE BUYING COMPANY LIMITED STATEMENT OF DIRECTORS RESPONSIBILITIES

FOR THE YEAR ENDED 30 SEPTEMBER 2010

The companies code, 1963 (Act 179) requires the Directors to prepare financial statements for each financial period that give a true and fair view of the state of affairs of the Company as at end of the financial year and of its Profit and Loss for the year.

In preparing these financial statements the Directors are required to:

- Select suitable accounting policies and apply them consistently;
- · Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting standards have been followed, subject to any material departures, disclosed and explained in the financial statements; and
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business;

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies code 1963. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The above statement which should be read in conjunction with the statement of the Auditors responsibilities set out in the Report of the Auditors is made with a view to distinguishing for shareholders, the respective responsibilities of the Directors and the Auditors in relation to the financial statement.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF PRODUCE BUYING COMPANY LIMITED ON THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 SEPTEMBER 2010

Report on the Financial Statements

We have audited the accompanying financial statements of Produce Buying Company Limited which comprise the statement of financial position as of September 30, 2010, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Directors' Responsibility for the Financial Statements

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and in the manner required by the Companies Code, 1963 (Act 179). This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Directors, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

We have not had sight of the Title Deed of the sheds and buildings ceded to the company by Ghana Cocoa Board as stated in the Company's books to establish the company's ownership of these assets. However as stated in Note 25, the Government has undertaken to ensure that Ghana Cocoa Board takes all steps required of it under the Ceding Agreement of June 30, 1999 to effectuate the cession of assets to Produce Buying Company Limited.

Opinion

In our opinion, subject to any adjustment that might have been found to be necessary had we been able to satisfy ourselves as to the title deeds referred to above, the financial statements give a true and fair view of the financial position of Produce Buying Company Limited as of September 30, 2010 and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Code, 1963 (Act 179).

Report on Other Legal and Regulatory Requirements

The Companies Code, 1963, (Act 179) requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- Except for the Title Deed of the sheds and buildings ceded to the company by Ghana Cocoa Board, we have obtained all the information and explanations which to the best of our knowledge and beliefs were necessary for the purpose of our audit.
- II In our opinion proper books of accounts have been kept by the company, so far as appears from our examination of those books, and
- The company's statement of financial position and statement of comprehensive income are in agreement with the books of accounts.

PRODUCE BUYING COMPANY LIMITED

NOTES TO THE FINANCIAL STATEMENTSFOR THE YEAR ENDED 30 SEPTEMBER 2010

1.0. REPORTING ENTITY

Produce Buying Company Limited is a company registered and domiciled in Ghana. The address of the company's registered office can be found on page 1 of the annual report. The company is authorised to buy, collect, store, transport and otherwise deal in cocoa, coffee and sheanuts produced in Ghana on behalf of Ghana Cocoa Board.

2.0 BASIS OF PREPARATION

a. Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) and its interpretations adopted by the International Accounting Standards Board (IASB).

b. Basis of measurement

The financial statements are prepared on the historical cost basis except for financial instruments and other assets that are stated at fair values.

c. Functional and presentational currency

The financial statements are presented in Ghana Cedis (GH¢) which is the company's functional currency.

d. Use of estimates and judgement

The preparation of financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

2010 Financial Statements

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are described in notes 4 and 29.

3.0 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these financial statements by the company.

a. Financial Instruments

(i) Non-derivative financial instruments

Non-derivative financial instruments comprise investment in shares and treasury bills, trade and other receivables, cash and cash equivalents, loans and borrowings and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus, for instrument not at fair value through profit and loss, any directly attributable transaction cost. Subsequent to initial recognition non-derivative financial instruments are measured at amortised cost using the effective interest rate method, less any impairment losses, if any.

Non-derivative financial instruments are categorised as follows:

- Loans and receivables these are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These assets are measured at amortised cost using the effective interest rate method, less any impairment losses.
- Financial liabilities measured at amortised cost this relates to all other liabilities that are not designated at fair value through profit or loss.
- Available-for-sale financial assets The Company's investments in shares are
 classified as available-for-sale financial assets. Subsequent to initial
 recognition, they are measured at fair value and changes therein, other than
 impairment losses are recognised directly in equity. When an investment is
 derecognised, the cumulative gain or loss in equity is transferred to profit or
 loss.

(ii) Off setting

Financial assets and liabilities are set off and the net amount presented in the balance sheet when, and only when, the company has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions.

(iii) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(iv) Stated capital (Share capital)

Ordinary Shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

Preference Shares

Preference share capital is classified as equity if it is non-redeemable or is redeemable but only at the company's option, and any dividends are discretionary. Dividends thereon are recognised as distributions within equity upon approval by Board of Directors.

Preference share capital is classified as a liability if it is redeemable on a specific date or at the option of the shareholders or if dividend payments are not discretionary.

Dividends thereon are recognised as distributions within equity upon approval by Board of Directors.

Repurchase of stated capital (treasury shares)

When stated capital recognised as equity is repurchased, the amount of the consideration paid which includes directly attributable costs, is net of any tax effects, and is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are presented as a deduction from total equity. When treasury shares are sold or reissued subsequently, the amount received is recognised as an increase in equity, and the resulting surplus or deficit on transaction is transferred to/from retained earnings.

2010 Financial Statements

(b) Leases

(i) Classification

Leases that the company assumes substantially all the risks and rewards of ownership of the underlying asset are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and present value of the minimum lease payments. Subsequent to initial recognition, the leased asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are classified as operating leases.

(ii) Lease Payments

Payments made under operating leases are charged to the income statement on a straight-line basis over the period of the lease. When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

Minimum lease payments made under finance leases are apportioned between the finance expense and as reduction of the outstanding lease liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

(c) Property, plant and Equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, and any other costs directly attributable to bringing the asset to a working condition for its intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components).

(ii) Subsequent costs

The cost of replacing part of an item of property, plant or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be measured reliably.

The costs of the day-to-day servicing of property, plant and equipment are recognised in income statement as incurred.

(iii) Depreciation

Depreciation is recognised in the income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

Buildings		3%
Plant and Machinery		20%
Motorvehicles		20%
Operational Vehicles	Arte de la Company	10%
Furniture and equipment		20%

Depreciation methods, useful lives and residual values are reassessed at each reporting date. Gains and losses on disposal of property, plant and equipment are included in the income statement.

(d) Intangible Assets

Software

Software acquired by the company is stated at cost less accumulated amortisation and accumulated impairment losses.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use. The estimated useful life of software is five years.

(e) Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the first-in first-out principle, and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less estimated selling expenses.

2010 Financial Statements

(f) Trade and Other Receivables

Trade receivables are stated at amortised costs, less impairment losses. Specific allowances for doubtful debts are made for receivables of which recovery is doubtful.

Other receivables are stated at their cost less impairment losses.

(g) Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and bank balances and these are carried at amortised cost in the balance sheet.

(h) Employee Benefits

Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a separate entity and will have no legal or constructive obligation to pay future amounts. Obligations for contributions to defined contribution schemes are recognised as an expense in the income statement when they are due.

(i) Revenue

(i) Sale of goods

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns, trade discounts, taxes and volume rebates. Revenue is recognised when the significant risks and rewards of the ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement in the goods, and the amount of revenue can be measured reliably.

(ii) Sale of services

Revenue from services rendered is recognised in the income statement when the service is performed.

(j) Finance Income and Expense

Finance income comprises interest income on funds invested (including available-for-sale financial assets) and dividend income. Interest income is recognised in the income statement using the effective interest method. Dividend income is recognised in the statement of comprehensive income statement on the date that the company's right to

receive payment is established, which in the case of quoted securities is the exdividend date.

Finance expenses comprise interest expense on borrowings. All borrowing costs are recognised in the income statement using the effective interest method.

(k) Impairment

(I) Financial assets

A financial asset is considered impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its current fair value.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

All impairment losses are recognised in the income statement. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognised.

(ii) Non-financial assets

The carrying amounts of the company's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

(I) Income tax

Income tax expense comprises current and deferred tax. The company provides for income taxes at the current tax rates on the taxable profits of the company.

Income tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years. Deferred tax is provided using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial

2010 Financial Statements

reporting purposes and the amounts used for taxation purposes.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(m) Dividend

Dividend payable is recognised as a liability in the period in which they are declared.

(n) Event After Balance Sheet Date

Events subsequent to the balance sheet date are reflected in the financial statements only to the extent that they relate to the year under consideration and the effect is material.

(o) Segment reporting

Asegment is a distinguishable component of the company that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Segment information based on the internal reports regularly reviewed by the company's Chief Operating Decision Maker in order to assess each segment's performance and to allocate resources to them. Currently the company presents segment information in respect of its business segments (see note 5). Under the management approach, the company will present segment information in respect of marketing and haulage.

(p) Earnings per share

The company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

(q) Borrowing Cost

Borrowing costs shall be recognised as an expense in the period in which they are incurred, except to the extent that borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset shall be capitalised as part of the cost of that asset.

The capitalisation of borrowing costs as part of the cost of a qualifying asset shall commence when: expenditures for the asset are being incurred; borrowing costs are being incurred; and activities that are necessary to prepare the asset for its intended use or sale are in progress

Capitalisation of borrowing cost shall be suspended during extended periods in which active development is interrupted. Capitalisation of borrowing costs shall cease when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are completed.

(r) The following standards, amendments and interpretations were also applicable for the year ended 30th September 2010 and were either not relevant to Produce Buying Company Limited or had no impact on the Company's Financial Statements:

Amendments to IAS 32 and IAS 1 'Puttable Financial Instruments and Obligations

Arising on Liquidation';

Amendments to IFRS 1 and IAS 27 'Cost of an Investment in a Subsidiary, Jointly

Controlled Entity or Associate';

IFRIC 13 'Customer Loyalty Programmes';

IFRIC 15 'Agreements for the Construction of Real Estate'.

- IFRS 3 (revised) 'Business Combinations'
- Amendment to IFRS 2 'Share-based Payment: Group Cash-settled Share-based Payment Transactions'

2010 Financial Statements

(s) New standards and interpretations not yet adopted

IFRS 9 'Financial Instruments'

The IASB issued IFRS 9 in November 2009. The standard introduces new requirements for the classification and measurement of financial assets and is applicable for accounting periods beginning on or after 1st January 2013.

IAS 24 (revised) 'Related Party Disclosures'

The IASB issued IAS 24 (revised) in November 2009. The revisions provide a partial exemption from the disclosure requirements for government-related entities and simplify the definition of a related party. The revisions are applicable for accounting periods beginning on or after 1st January 2011 and are not expected to have a material impact on the company's financial statements.

Other standards, amendments and interpretations

Up to the end of 2009, IFRIC issued IFRIC 17 'Distribution of Non-cash Assets to Owners', applicable for accounting periods beginning on or after 1st July 2009, IFRIC 19 'Extinguishing Financial Liabilities with Equity', applicable for accounting periods on or after 1st July 2010, amendments to IFRIC 14 'Prepayment of a Minimum Funding Requirement', applicable for accounting periods on or after 1st January 2011 and amendments to IAS 32 'Classification of Rights Issues', applicable for accounting periods beginning on or after 1st February 2010. These amendments and interpretations are not expected to have a material impact on the Company's financial statements.

4.0 DETERMINATION OF FAIR VALUES

A number of the company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and / or disclosure purposes based on the following methods. Where applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(i) Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the current market rate of instruments with similar credit risk profile and maturity at the reporting date. Receivables due within 6-month period are not discounted as the carrying values of approximate their fair values.

(ii) Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. Instruments with maturity period of 6 months are not discounted as their carrying values approximate their fair values.

(iii) Investments in equity

The fair value of available-for-sale financial assets is determined by reference to their quoted bid price at the reporting date.

5 SEGMENT REPORTING

Segmental information is presented in respect of the company's business segments. The primary format and business segments, is based on the company's management and internal reporting structure.

The company's results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly income-earning assets and revenue, interest-bearing loans, borrowings and expenses, and corporate assets and expenses which are managed centrally.

The two main business segments are:

- Marketing sale of cocoa beans
- Haulage transporting of cocoa beans

The company does not have a geographical segment.

Ecobank Ghana Limited

The company has an overdraft facility of GH¢5,000,000 with Ecobank Ghana Limited to finance working capital and other operational bills. Interest rate is at the bank's base rate (currently 24.25% per annum) minus a spread of 3.75% per annum payable monthly in arrears. The facility is, secure by assignment and domiciliation of take-over margin/receivables commensurate with EBG commitment. The facility expires on 30 September 2011.

Standard Chartered Bank

The company has an overdraft facility of GH¢30,000,000 with the bank as a bridging facility pending the conversion of Cocoa Take Over (CTO's) into cash by COCOBOD. Interest rate is at SCB base rate (currently 24% minus 4%) payable monthly in arrears and subject to review in line with market conditions. 25 TITLE DEED

Included in the ordinary shares issued for consideration other than cash is an amount of GH¢954,000 which represents part of the value of Property, Plant and Equipment ceded to Produce Buying Company Limited by Ghana Cocoa Board. As mentioned in our report, we have not had sight of the Title Deed of the sheds and buildings as stated in the Company's books to establish the Company's ownership of these assets. However, in a letter dated November 18, 1999 the Government of Ghana gave the following undertaking:

FOR THE YEAR ENDED 30 SEPTEMBER 2010

- "The Government has taken over the interest of the Ghana Cocoa Board (Cocobod) in PBC and accordingly undertakes to ensure that Cocobod takes all steps required of it under the Ceding Agreement of June 30, 1999 executed between the Cocobod and PBC including but not limited to the perfection of all interests and the execution of all documents to effectuate the cession of assets to PBC".
- "The Government further assures the investing public that in the event of Cocobod failing its obligations under the cession agreement, it will take such additional steps including but not limited to compulsory acquisition and arranging of payment of adequate compensation by Cocobod so as to concretise the interest of PBC in the said assets".

EARNINGS PER SHARE

Basic and Diluted earnings per share

27 DIVIDEND

Final dividend of GH¢0.0088 per share amounting to GH¢4,234,000.00 has been proposed for the year ended 30th September 2010.

28 FINANCIAL RISK MANAGEMENT

The company has exposure to the following risks from its use of financial instruments;

Credit risk Liquidity risk Market risk

FOR THE YEAR ENDED 30 SEPTEMBER 2010

This note presents information about the company's exposure to each of the above risks, the company's objectives, policies and processes for measuring and managing risk, and the company's management of capital.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the company's risk management framework. The Board has established the Audit and Finance committee, which are responsible for developing and monitoring the company's risk management policies in their specified areas. The team includes selected members of executive management and report regularly to the Board of Directors on their activities.

The company's risk management policies are established to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations

The company's Audit and Finance Committee is responsible for monitoring compliance with the company's risk management policies and procedures, and for reviewing the adequacy of risk management framework in relation to the risks faced by the company. This committee is assisted in these functions by a risk management structure in all the units of the company which ensures a consistent assessment of risk management control and procedures.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables from customers.

Trade and other receivables

The company's exposure to credit risk is minimised as all sales are made to one individual customer. The company has transacted business with this customer over the years, there has not been much default in payment of outstanding debts.

FOR THE YEAR ENDED 30 SEPTEMBER 2010

Allowances for impairment

The company establishes an allowance for impairment losses that represents its estimate of incurred losses in respect of risk and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loan loss allowance established for homogeneous assets in respect of losses that have been incurred but not yet been identified. The collective loss allowance is determined based on historical data of payment for similar financial assets.

FOR THE YEAR ENDED 30 SEPTEMBER 2010

Exposure to credit risks

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was;

	2010	2009
	GH¢	GH¢
Available for sale Financial Assets	1,454,546	581,818
Loans and Receivables	32,555,979	32,265,614

	37,243,395	43,276,548
The maximum exposure to credit risk for trade receivables at the rep customer was;	orting date by type	of

Public Institutions	26,215,357	19,585,844

Impairment Losses

		2010		2009
	Gross	Impairment	Gross	Impairment
	GH¢	GH¢	GH¢	GH¢
Past due 0 - 180 days	26,215,357	0	19,585,844	0

The movement in the allowance in respect of trade receivables during the year was as follows

	2010	2009
	GH¢	GH¢
Balance at 1 October	26,215,357	19,585,844
Impairment loss recognised	. 0	0
	26,215,357	19,585,844

Based on historical default rates, the company believes that no impairment is necessary in respect of trade receivables past due up to 180 days.

Liquidity risk

Liquidity risk is the risk that the company either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access them only at excessive cost. The company's approach to managing liquidity is to ensure that it will maintain adequate liquidity to meet its liabilities when due.

FOR THE YEAR ENDED 30 SEPTEMBER 2010

Balance at 30 September 2009	83,137,951	73,485,014	1,557,740	8,095,197

Market risks

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Foreign currency risk

The company is not exposed to currency risk as there are no transactions and balances denominated in currencies other than the functional currency.

Interest rate risk

Profile

At the reporting date the interest rate profile of the company's interest-bearing financial instruments was;

	Carrying amount	
	2010	2009
Variable rate instrument	GH¢	GH¢
Financial liabilities	129,051,588	70,964,974
